

RAVENX

CHARITY TOKEN

THE PROBLEM:

LACK OF UTILITY IN THE BSC ECOSYSTEM

There have been a lot of RFI type projects lately but none of them had an actual utility that would make the project useful long term. Our solution is to make a token that will not only apply a 2% burn fee and a 2% redistribution fee, but also swap 2% of tokens from every transaction to BNB and send it to the Binance charity donation wallet.

TOKENOMICS

Raven X will have a more sensible total supply of 500M tokens. 4% will be gradually unlocked over 10 days to provide marketing funds, while 4% of the team tokens will be gradually unlocked for the next 6 months.*

Total supply: 500 000 000 RX

Marketing: 20 000 000 RX *

Team: 20 000 000 RX *

Presale: 250 000 000 RX

Listing: 210 000 000 RX

6% transaction fee will be split to:

2% burn fee

2% redistribution fee

2% donation fee

The Charity Wallet is designed for donors who do not specify the donation projects and allow BCF to distribute the fund accordingly. Our blockchain-based system will allow people to track the flow of financial transactions with transparency. Our team will perform professional and rigorous due diligence to select projects and on-ground collaborative organizations, ensuring that the social impact of each currency unit will be maximized. On behalf of the end-beneficiaries, we would like to express our thankfulness for your generosity.

ABOUT

Their aim is to create last-mile solutions for impactful social projects and scaling them up quickly to fundamentally change millions of lives. People with non-smart phones can now own crypto wallets to receive and transfer crypto currencies that serve as alternative assets to protect their property value.

MISSION

“With our partners and donors, we aim to not only create thoughtful solutions and long-term change for some of the world's most complex problems, but also a brand new experience for donating.”
